

## **The Next Wave in Display Innovation**

**Steven C. Webster**

### **Biography**

Steve Webster is Vice President for Research and Technology Commercialization for the 3M Display and Graphics Business. In that role, he is responsible for identifying technologies and developing products to meet the needs of display customers.

Steve received an S.B. in Electrical Engineering and an S.M. in Electrical Engineering and Computer Science from the Massachusetts Institute of Technology (MIT) in 1979. He started his career at Bell Laboratories, and joined 3M in 1981. He has held a number of technical and management positions in the fields of optical recording, data storage, telecommunications and display technology. Recent assignments include technical director for the Film/Light Management and Display Materials Technology Centers. He led the development of DBEF film for LCD displays, as well as new technologies for PDP and OLED displays. Prior to his current role, he was Staff Vice President for 3M Six Sigma, reporting to the CEO.

He is a member of the Institute of Electrical and Electronics Engineers, and the Society for Information Display. He serves on the Board of Directors for the Guthrie Theater, 3M Foundation and Friends of the Minneapolis Public Library.
