|---------------------------|---|-------------------|-------|------------------|-------|
| Title | Dr. | First Name | Xiuqi | Last Name | Huang |
| Affiliation | Visionox | | | | |
| Presentation Title | The Trend and Opportunity of AMOLED Technology | | | | |
| Biography | <p>Dr. Xiuqi Huang is the VP of Visionox. After receiving his Ph.D. in Material Physics and Chemistry from Institute of Semiconductors, Chinese Academy of Sciences, he started his career in Samsung group focusing on the R&D of LCD/AMOLED technology. Afterwards, he finished post-doctoral research at Tsinghua University and joined Visionox group leading the R&D team to successfully develop the first 12-inch AMOLED TV demo and the first flexible AMOLED display in Mainland China. Moreover, His R&D team also led the foundation of mass production of AMOLED panels at G5.5 AMOLED line (Kunshan) and G6 AMOLED line (Gu'an) of Visionox. Recently, his team has successfully developed Double-side Foldable AMOLED Display with a folding radius of 5mm, folding for >200,000 times. They also first introduced 4.01" AMOLED flexible display, which is the first mass produced "true-flexible" product on the shelf.</p> | | | | |
