Exhibitor Introduction	Founded in 2016, DeepBrain AI is world's first commercialized video synthesis company, with real-life application of Interactive AI Humans. Our AI system is never limited to a specific operating system. Our technology is being implemented in mobile devices, AI kiosks, and even smart cars. With our limitless AI Human technology, we plan to foresee and create blueprints for the future of humanity.	
Exhibit Description	AI STUDIOS AI Studios eliminates the need for costly studio, lighting, microphones, camera, set-staff, and even actors. Just by typing the script, this enables AI Humans to naturally speak, use body language and gestures just like real presenters. AI-Kiosk Experience futuristic communication devices that enable you to interact with your customers 24/7 in real time. You can communicate with AI humans through high-resolution Full HD screens and high-performance audio, and you can conveniently replace or add various accessories required in the service environment, such as card payment readers, ticket machines, facial recognition, and fingerprint recognition.	
Exhibit Product	AI STUDIOS, AI-Kiosk
