Exhibitor Introduction	<p>Founded in 2009, Enjet Co., Ltd., as a leader in Korea, produces and sells nanojet printers/coaters to help develop various industries such as smartphones, displays, semiconductors, glass, camera modules, bio and materials industries. We are making a continuous leap forward to grow as an eco-friendly and future-oriented company in the 21st century, and since our establishment, we are striving to develop a global market from core technology development to production and sales marketing. Based on our expertise and know-how and experience, we are continuing our customer's quality satisfaction and cooperative relationship, and we are practicing customer satisfaction management by acquiring Jang Young-sil Award, Innobiz, Excellent Patent Award, and ISO 9001.</p>	
Exhibit Description	<p>Enjet developed novel iEHD(electrohydrodynamics) nozzle, precise manufacturing, and electrical pulse control technology, which enable to generate femtoliter (nanoscale diameter) droplets. iEHD-based Printers includes high precision nozzle, motion, dual nozzles, automatic focusing, stable ink supply, laser technologies, which allows super-fine patterns less than 1 <math>\mu\text{m}</math> structures (line, dot, and complex shapes).</p>
