

iMiD 2022

The 22nd International Meeting on Information Display
August 23-26, 2022 / BEXCO, BUSAN, KOREA

Company Name	FlexiGO Inc.	Company Logo
Address	1065, Chungjeol-ro, Mokcheon-eup, Dongnam-gu, Cheonan-si, Chungcheongnam-do, Republic of Korea	
President	Lee, Ki-Yong	
Website	www.flexigo.co.kr	
E-mail	flexigo@flexigo.co.kr	
Telephone	+82-41-622-8689	
Fax	+82-41-622-8690	
Exhibitor Introduction	FlexiGO Inc. is a company that develops and manufactures testing equipment specialized for evaluation and inspection of mechanical durability and environmental reliability of materials/panels/modules/devices essential for R&D and commercialization of flexible displays.	
Exhibit Description	Reliability, durability, and life evaluation are essential for R & D and commercialization of flexible displays. FlexiGO Inc. will unveil its newly developed tester, Stretching Reliability Evaluation Tester, for the first time through this IMID exhibition. In addition, rolling and sliding reliability evaluation testers will also be exhibited and demonstrated. If you visit our booth, you can see the reliability evaluation testers of various types of flexible displays.	
Exhibit Product	Atmospheric Roll-Sliding Durability Tester, ‘Roll-Slidy-10’ ‘Tension-controlled’ rolling testers that minimize tension applied to sample during rolling test to keep the sample uniform and stable, exchangeable with ‘stress-free’ sliding testers that causes no external force to be applied to sample during sliding test. Stretching Durability Tester, ‘Stretcher’ - Flexible Display Stretching Durability Evaluation Equipment - Tensile, compression and torsion tests are possible by developing and applying a multi-axis Moving Control stretching structure.
