

# iMiD 2022

The 22nd International Meeting on Information Display  
August 23-26, 2022 / BEXCO, BUSAN, KOREA

Company Name	YouLab	Company Logo
Address	52 Ewhayeodae-gil Seodaemun-gu Seoul 03760, Korea	
President	YOUNGMIN YOU	
Website	<a href="http://youlab.ewha.ac.kr">http://youlab.ewha.ac.kr</a>	
E-mail	odds2@ewha.ac.kr	
Telephone	+82-2-3277-2854	
Fax	-	
Exhibitor Introduction	<p>YouLab focus on organic molecular and polymeric materials. These materials offer unique advantages for creating functions. The structure of organic molecules and polymers can be modified over a broad range through synthetic techniques. Their syntheses are cost-effective, and enable fine tuning of their electronic and photonic properties. While the organic molecules and polymers serve as substrates for constructing eco-friendly, flexible devices, our prime focus is placed on the active role. The activities can be precisely modulated by structural controls, as being exploited by numerous biological systems. We seek to provide novel strategies to unify organic molecules and inorganic materials. These two material classes have evolved differently, and face own limitations. We employ inorganic chemistry knowledge, particularly organometallic chemistry, to develop novel metal-containing molecules and polymers for photonic and electronic applications.</p>	
Exhibit Description	<p>YouLab belongs to Division of Chemical Engineering and Materials Science, and Graduate Program in System Health Science Engineering, Ewha Womans University.</p>	
Exhibit Product	Research Portfolio and Chemicals for Organic Electroluminescence Devices
