

iMiD 2022

The 22nd International Meeting on Information Display
August 23-26, 2022 / BEXCO, BUSAN, KOREA

Company Name	Korea University Advanced Material Transfer Evaluation Center	Company Logo 
Address	2511 Sejong-Ro, Sejong-City, Korea University, 30019,	
President	Prof. MunPyo Hong	
Website		
E-mail	goodmoon@korea.ac.kr	
Telephone	+82-10-7279-9601	
Fax	+82-44-860-1759	
Exhibitor Introduction	<ul style="list-style-type: none">· A Specialized Institution for commercializing core technology of advanced novel material by evaluating newly developed materials and supporting technology transfer that reflects the demands of device companies, in the field of display, semiconductor & energy device.· A bridging role for efficient collaboration between basic research groups as technology suppliers and chemical companies as technology demanders.	
Exhibit Description	<ul style="list-style-type: none">· Center Organization- <u>Research Institute</u> possessing core technology of advanced new materials + <u>Evaluation Fab.</u> possessing capability of material evaluation & device fabrication for commercialization- National top-level Clean Room Test Line for fabrication of working sample for display/semiconductor/energy device (Size: 350 m², Class: 100~1000)- Completion of full process equipment to fabricate display/ semiconductor/ energy device working sample with 10x10 cm² substrate- Possessing experts with an understanding of the material and real field experience about the process and device to which the material is applied (7 professors with more than 15 years of experience at SDC and LGD)	
Exhibit Product	<ul style="list-style-type: none">- Poster for current projects & activities- Developing samples
