Exhibitor Introduction	The Kurt J Lesker Company has been supporting the vacuum industry for the past 69 years with our main objective to be our customer's primary vacuum partner. KJLC's materials division supplies a wide variety of both sputtering targets and evaporation pellets/pieces. We also offer a full range of e-beam crucible liners and thermal evaporation sources. We have target bonding facilities in both the US and Shanghai. Quality is our top priority.	
Exhibit Description	Stop by our booth to meet with our team regarding your deposition material needs. With many years in the PVD industry, we are also happy to assist with technical support.	
Exhibit Product	High quality sputtering targets, evaporation materials, evaporation sources, target bonding services. bellows, feedthroughs, valves, flanges.
