iMiD 2023

The 23rd International Meeting on Information Display
August 22-25, 2023 | BEXCO, BUSAN, KOREA

Company Name	3Dimensional Optical Technology Lab. Kyungpook National University	Company Logo
Address	Kyungpook National University, Daegu, South Korea	 KNU KYUNGPOOK NATIONAL UNIVERSITY  Three Dimensional Optical Technology
President	Joonku Hahn	
Website	3dot.knu.ac.kr	
E-mail	jhahn@knu.ac.kr	
Telephone	+82-53-950-5514	
Fax	+82-53-950-5505	
Exhibitor Introduction	<p>3DOT LAB. in Kyungpook National University started in 2011 and we have focused on the technologies for realizing 3D display systems. We have very strong points in not only optical and mechanical designs, but also electronics and programming for controlling. Especially, we believe that the demonstration in display technology is very important and we have participated in IMID exhibitions in 2017, 2018, 2019, 2021, and 2022.</p>	
Exhibit Description	<p>In this year, we plan to present our recent research achievements on AR displays for metaverse. We expect to communicate with other researchers and discuss the prospect of 3D display technology together.</p>	
Exhibit Product	<ol style="list-style-type: none">1. Holographic near-eye display2. Cylindrical light field display3. Hologram printing technology
