Fax		
Exhibitor Introduction	<p>We are experts in applied energy. PulseForge, Inc. designs and manufactures revolutionary pulsed-light systems for industrial processes. PulseForge utilizes applied energy in a precise and targeted manner to enable innovation in manufacturing. Our expertise and tools empower our customers to explore novel materials and manufacturing methodologies, driving dynamic and efficient production at scale.</p> <p>Most semiconductor fab managers feel tremendous margin pressure, so PulseForge offers an innovative process that lowers TCO by over 30% while improving yield, so you can increase production while improving profitability. At PulseForge, we envision a future free of manufacturing limitations. A future where designers create freely and do not have to restrict or modify their designs in order to get them manufactured...a</p>	

iMID 2023

August 22-25, 2023 / BEXCO, BUSAN, KOREA

	<p>future where electronics can be integrated into textiles, plastics, and recycled materials easily, affordably, and in volume. A future with advances in semiconductors, additive manufacturing, packaging, drying, cleaning, and decontamination. Explore the possibilities www.pulseforge.com</p>
Exhibit Description	<p>Booth with Brochures of different PulseForge technologies Brochures of different PulseForge tools Cutout of PD-300SA</p>
Exhibit Product	<p>No Tools display</p>
