Fax	+31 475 600 316	
Exhibitor Introduction	<p>Admesy is founded in 2006 by former Philips engineers active in creating display testing solutions. Building on our engineering expertise, we stuff black boxes with measurement power. Over the years, our product range expanded to spectrometers, colorimeters, light meters and 2D imaging devices. Newer, faster, and more accurate than any test &amp; measurement solutions the world has ever seen. Happy and growing, our customer base ranges from large volume 24/7 production testing, smaller volume niche system manufacturers and single devices used for product and test development. We meet the needs of a constantly growing range of industries and applications. With endless possibilities.</p>	
Exhibit Description	<p>In this exhibit, you will discover the essential devices and techniques used to ensure optimal measurement solution for various display.</p> <p>We offer the solution for all types of spot measurements on displays. Developed to your needs, this series consists of different measurement tools to cover all possible measurement demands. Spectral power distribution, colorimetric tristimulus values, luminance or flicker. For all display measurements, Admesy has a great solution. All Admesy series designed and build robust for 24/7 use, easy to integrate in production environments and offering an excellent price-performance ratio.</p>	
Exhibit Product	Spectrometer, Colorimeter & Lightmeter
