| Exhibitor Introduction | Fluxim Inc. has been commercializing R&D tools for display and photovoltaics industries since its incorporation in 2007 sixteen years ago. Its simulation software SETFOS is a leading design & optimization software for OLEDs and other emerging LED and QD-enabled display technologies. Moreover, measurement platforms for R&D are provided for characterization of fresh samples (using PAIOS and PHELOS instruments) and for analysis of device degradation (with the instruments LITOS and LITOS LITE). |   |
| Exhibit Description    | Fluxim's commercial tools for R&D in emerging display technologies including OLED, QD-LED, Perovskite LED are introduced at the exhibit   |   |
| Exhibit Product        | The all-in-one opto-electronic measurement system Paios and the angular spectrometer Phelos is demonstrated besides the simulation software SETFOS and LAOSS.   |   |
