Exhibitor Introduction	<p>The Advanced Institute of Convergence Technology was established in March 2008 based on the realization that convergence is the solution to lead the future of science and industry based on creativity and innovation. It took a new leap forward in July 2018 through a collaboration between Gyeonggi-do and Seoul National University.</p> <p>The Advanced Institute of Convergence Technology aims to become a trusted research institution for the future with science and technology through its roles in the Fourth Industrial Revolution, solving societal issues, supporting technology for small and medium-sized companies, and becoming the network tower for Gyeonggi-do's industrial, academic, research, and government collaboration.</p>
