Exhibitor Introduction	Founded in 2017, FlexiGO Inc. specializes in the development of reliability and durability testing equipment for flexible displays. We design and manufacture advanced testing systems to assess the reliability and durability of flexible display modules, panels, components, and materials. Our key product lineup includes Foldy, Rolly, Slidy, Roll-Slidy, and Roomy. With our proprietary and patented Stress-Free Folding technology, we enable precise evaluation of a sample's inherent durability without applying unnecessary stress during testing. In addition, our automated inspection systems offer greater convenience and enhanced accuracy in testing processes. FlexiGO continues to expand its research and development efforts beyond mobile and tablet displays into automotive display testing equipment. Through these innovations, we strive to address a broader range of customer needs and accelerate our growth in the global market.	

IMiD 2026

The 26th International Meeting on Information Display
August 18-21, 2026 / BEXCO, BUSAN, KOREA

Exhibit Description	FlexiGO provides advanced testing equipment for folding, rolling, and sliding mechanisms in flexible displays. Our patented Stress-Free Folding technology enables precise durability evaluation without applying unnecessary stress to samples. We deliver high-precision and automated testing solutions for mobile, tablet, and automotive display applications.
Exhibit Product	Dual folding tester – D Foldy-20 Automotive sliding tester
