Exhibitor Introduction	<p>Idemitsu Kosan was founded in Japan in 1911 and is one of the leading Japanese petroleum companies, operating five major business segments including fuel oil, basic chemicals, and high-performance materials. The group achieved sales of 9.1 trillion yen in fiscal year 2024 and employs approximately 14,000 people worldwide.</p> <p>The company began research and development of OLED materials, one of its core business fields, in 1985. Since then, Idemitsu Kosan successfully commercialized blue light-emitting materials in 1997 and, in 2007, contributed to the world's first mass production of OLED TVs. Thereafter, a wide range of its materials has been adopted in light-emitting devices by major panel manufacturers worldwide, significantly contributing to the commercialization and widespread adoption of OLED products, including televisions and smartphones.</p> <p>In March 2023, Idemitsu Kosan established Idemitsu Advanced Materials Korea in South Korea as a core R&amp;D center for OLED material development. Going forward, the Company aims to provide technologies that closely reflect the needs of customers in South Korea, accelerate the growth of its advanced materials business, and further promote collaboration with leading South Korean global companies and academic institutions.</p>
