Exhibitor Introduction	“Building the Next Generation of Display Professionals” The Korea Display Industry Association (KDIA) operates step-by-step talent development programs to systematically foster key professionals for the display industry	
Exhibit Description	“Display Bootcamp” targets undergraduate students by supporting display-specialized curricula at participating universities. It offers hands-on project-based training and internships at related companies. KDIA supports the universities running the programs and facilitates partnerships with companies, enabling students to gain real-world industry experience. “Display Academy” provides tailored training courses for both job seekers and current employees. Through a curriculum focused on practical skills, participants gain competencies that help them successfully advance into careers at top display companies. “Program for Developing R&D Specialists (Master’s & Ph.D.)” In partnership with top graduate schools in Korea, this program cultivates advanced R&D professionals who will lead the future of display
