Exhibitor Introduction	Visual Semiconductor, Inc. (VSI) is a technology company serving both device manufacturers/distributors and content creators/distributors. VSI develops and provides key hardware and software technologies that enable next-generation glasses-free 3D experiences. Its long-term vision is to build a complete glasses-free 3D ecosystem, connecting devices, platforms, and content. Beyond supplying core technologies, VSI aims to participate in the recurring revenue generated by the content and services enabled by its ecosystem.	
Exhibit Description	Visual Semiconductor, Inc. (VSI) will show their groundbreaking GF3D™ (Glasses-Free 3D) Display technology at this exhibition. This technology can convert standard 2D content into immersive 3D imagery in real time without any glasses or eye-tracking systems. GF3D™ technology can provide stable and natural three-dimensional depth experience to multiple viewers simultaneously.	
Exhibit Product	65-inch 8K Glasses-Free 3D Display , 27-inch 5 K Glasses-Free 3D Display, 15.6-inch Glasses-Free 3D Display, 10.1-inch Glasses-Free 3D Display , 6.58-inch Glasses-Free 3D Display
